Dear Sirs,

Re: National Grid Norwich to Tilbury Pylon Scheme

I write with reference to the above proposed scheme, and on behalf of councillors and residents of Mountnessing Village, an area within the greenbelt land which will be directly impacted by your proposed scheme.

This letter re-confirms our stance for this proposal and reiterates previous communications with yourselves that residents and the Village Councillors are strongly opposed to this proposal and request that further investigations are held focusing on other alternatives to overhead pylons.

The new redesigned route which has been published in recent weeks still significantly impacts on the rich tapestry of the countryside around Mountnessing and our surrounding villages. The pylons are in direct parallel with Mountnessing residents' houses, our historical village church of St Giles and they impact substantially on local agricultural land used by local farmers. Not to mention significantly ruining the Wid Valley countryside and local flora and fauna for generations to come.

We urge you to reconsider this proposal, before impacting not just our residents now, but future generations to come.

Yours sincerely

Liz Fajimolu
